

# COTTON MACHINE WORKS, LLC.

## PLASTIC WRAP DETECTION SYSTEM

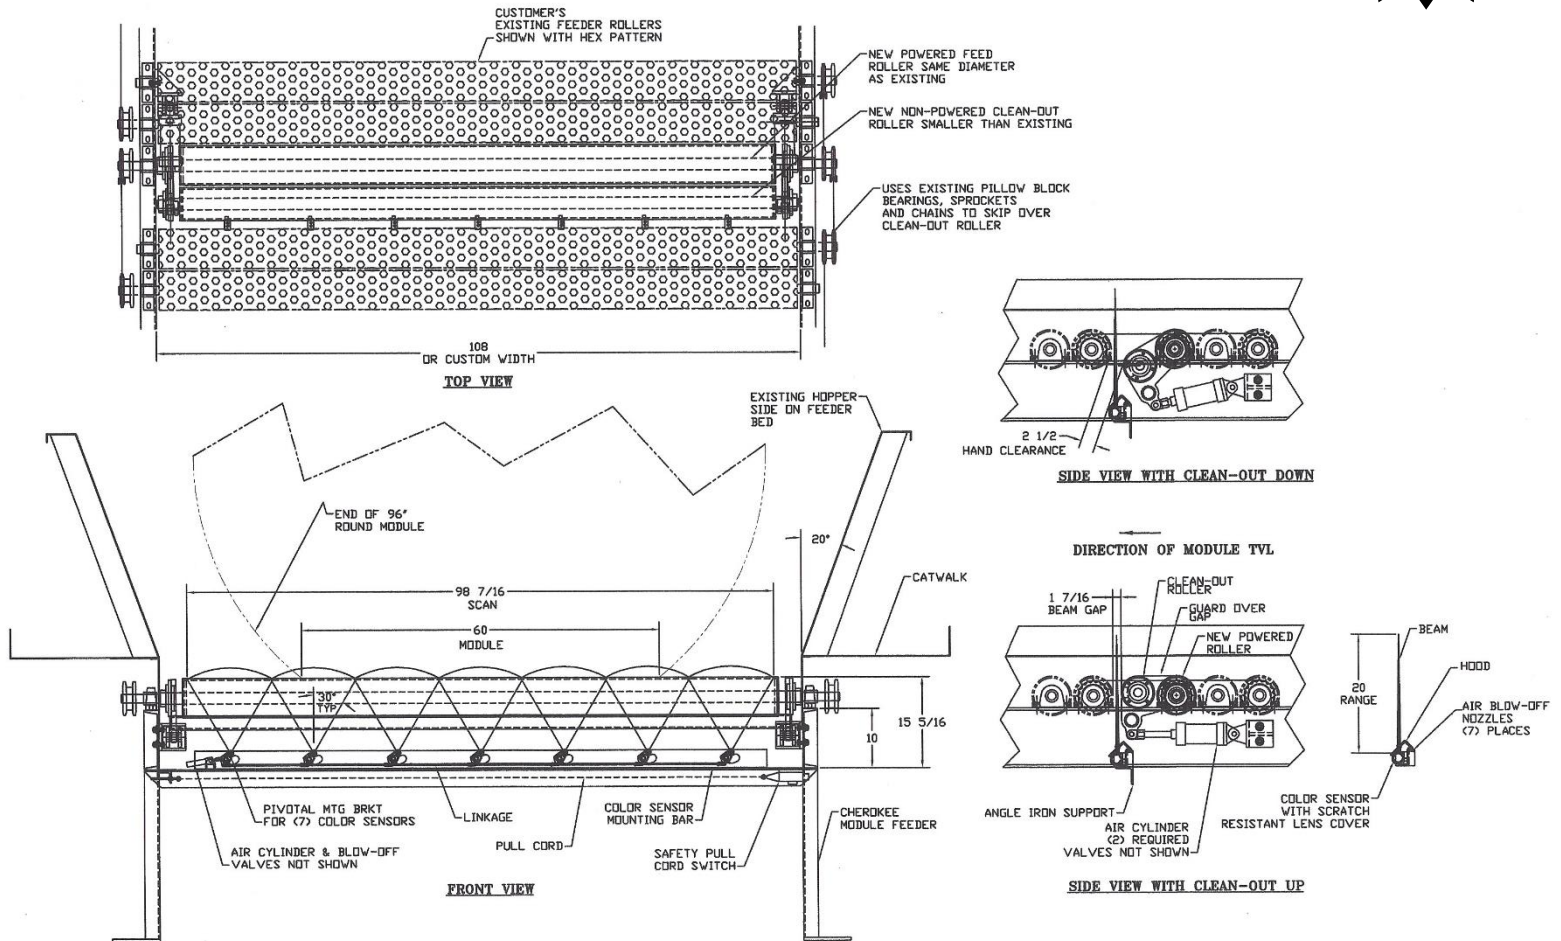

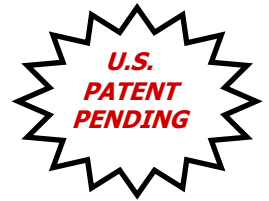

### PWDS-108

**“Finally, a solution to detect plastic before it enters your gin!”**

System is designed to continuously scan the full-width of the feeder bed searching for plastic wrap used on the Round Modules of cotton. When detected the system will provide outputs to auxiliary contacts for customers desired use. A small electrical console will be provided with necessary controls to operate the system. We can custom build one for your application.

#### ADVANTAGES:

1. Drastically reduces penalties
2. (7) Color Sensors continuously sweep bottom of module and feeder bed scanning for plastic wrap
3. Can detect up to 16 colors
4. Clean-out Roller pivots downward thus allowing room to remove plastic
5. Fits most Roller Bed Feeders and easy to install at any location of feeder bed
6. Simple and Safe
